Valerus Field Solutions, a division of SNC-Lavalin, provides oil & gas handling equipment used in wellhead production, compression, processing and treating. The recent closure of this facility, located in Sealy, TX, offers companies engaged in the production of pipe, tanks, vessels, and oil & gas handling equipment or who perform general metal fabrication and welding operations, the opportunity to purchase quality used equipment at a significant savings compared to new. This impressive offering of machinery features:

**Pipe Fabrication**
- HGG SPC 1200RB 3D CNC Pipe Profiler (New 2014)
- Vernon Tool 5-Axis CNC Pipe Cutter

**Welding Equipment**
- (70) Sets of Tank Turning Rolls - from 5,000-Lb to 120,000-Lb
- (10) Welding Manipulators
- (10) Welding Positioners
- (50+) Miller Welders - including (21) Miller PipeWorx 400 (New to 2018)
- (20+) Lincoln Welders - up to 1000-Amp

**Metal Fab Equipment**
- Copier 16S Beaver Beveler
- Piranha 30 & 50-Ton Ironworkers
- Horizontal Band Saws

**Material Handling**
- Straddle-Type Mobile Gantry Yard Crane
- Taylor 40,000-Lb (Approx) Diesel Forklift Truck
- Flat Bed & Drop Deck Trailers

Preview: 7 July 2020, 8:00 am - 4:00 pm CT or earlier by appointment
Plant & Production Support
• Air Handling Equipment
• Dust Collectors

Inventory
• Huge Quantity of Spare Parts and Components Used in the Production of Oil & Gas Handling Equipment
